Introduction

The most obvious consequence of spinal cord injury (SCI) is paralysis. However, SCI also has widespread consequences for many body functions, including bladder, bowel, respiratory, cardiovascular and sexual function. Physiotherapy rehabilitation for people with spinal cord injury The most obvious consequence of spinal cord injury SCI is paralysis However SCI also has widespread consequences for many body functions including bladder bowel respiratory cardiovascular and sexual function.

Home Books NCBI Bookshelf provides free online access to books and documents in life science and healthcare. Search read and discover Human brain Wikipedia The adult human brain weighs on average about 1.2–1.4 kg (2.6–3.1 lb) which is about 2% of the total body weight with a volume of around 1260 cm³ in men and 1130 cm³ in women although there is substantial individual variation. Neurological differences between the sexes have not been shown to correlate in any simple way with IQ or other measures of cognitive performance.
